DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 8 and 9, drawn to an image sensor with a red filter;
 - II. Claims 7, 10 and 11, drawn to an image sensor having a means for distinguishing a blue sky from a cloudy sky;
 - III. Claims 12-21, drawn to an image sensor having a specific housing configuration.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as limiting the field of view of any type of image sensor. Invention I, can be used in cameras or machine vision systems. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
